

Sea Turtle Facts

Sea turtle nests are called *clutches*.

Baby sea turtles are called *hatchlings*.
Sea turtles usually hatch at night.

Adult sea turtles can reach 6 feet long,
and weigh up to 2,000 pounds.

“Small” adult sea turtles typically weight 60 pounds.

Sea turtles can live a long time,
some are more than 100 years old.

A group of sea turtles is called a *bale*.

Sea turtles don't hide inside their shells like land turtles.

Sea turtles can hold their breath for hours.

Sea turtles eat sponges, jellyfish, and algae.

There are seven different species of sea turtles:
flatback, green, hawksbill, Kemp's ridley, leatherback,
loggerhead, and olive ridley.
